

CLAIMS

1 1. A guide for aiding in the installation of refrigeration lines through a partition
2 comprising in combination:

3 an attachment bracket comprising a planar surface having an aperture formed
4 therethrough, and bounded on a first edge by a first planar side piece and bounded
5 on a second edge by a second planar side piece, said side pieces being generally
6 parallel to one another and extending generally perpendicularly from a face of
7 said planar surface, and

8 a guide tube having opposite distal ends defining a passageway therethrough and
9 an axial orientation which changes over its length, wherein said guide tube is
10 secured in the aperture formed in said planar surface so that a first distal end of
11 said guide tube is on a first side of said partition and a second distal end of said
12 guide tube is on a second side of said partition.

1 2. The device of Claim 1 wherein said guide tube is detachable from said attachment
2 bracket.

1 3. The device of Claim 1 wherein a portion of said guide tube is detachable from said
2 attachment bracket.

1 4. The device of Claim 1 wherein said guide tube is rigid.

1 5. The device of Claim 1 wherein said guide tube is flexible.

1 6. The device of Claim 1 wherein a portion of said guide tube is flexible.
